Ron Yehonatan Keinan

JUNIOR DEVOPS & CLOUD ENGINEER

Beer Sheva, Israel
linkedin.com/in/ron-yehonatan-keinan | github.com/Kinanw38

PROFESSIONAL SUMMARY

Junior DevOps & Cloud practitioner with hands-on project experience in AWS EKS, Kubernetes, Terraform and CI/CD. Built and tested practical infrastructure projects using AI-assisted development and iterative troubleshooting. Served as an aircraft technician in the Israeli Air Force and worked as a self-employed computer technician, bringing strong operational discipline and a continuous learning mindset.

DEVOPS & CLOUD PROJECTS

2026 **EKS INCIDENT SIMULATOR WITH AI DIAGNOSTICS**

- Built an AI-assisted incident-response platform for AWS EKS, simulating OOMKilled, CrashLoopBackOff and broken Service routing, and guiding investigation and remediation.
- Tested Demo and Live modes, combining Kubernetes cluster data, logs and Events with AI-assisted Root Cause Analysis (RCA) and a rule-based fallback.

2026 **DEVOPS REPO CHECKER**

- Defined an open-source repository checker with 27 rule-based checks across Docker, Kubernetes, CI/CD, Terraform/AWS, security and documentation.
- Directed AI-assisted implementation and iterative testing of a bilingual Hebrew/English UI, local CLI, prioritized findings and GitHub Actions deployment.

2025 **AWS EKS DEVOPS & CI/CD PLATFORM**

- Built a Terraform-based AWS EKS environment using AI-assisted development, including AWS networking and IAM, Bash scripts for automated setup and teardown, and Jenkins pipelines for Docker image builds and Kubernetes rollouts.
- Implemented Prometheus and Grafana monitoring.

TECHNICAL EXPERIENCE

2024–2025 **SELF-EMPLOYED COMPUTER TECHNICIAN**

- Diagnosed hardware and Windows issues, replaced and upgraded components, and installed and maintained operating systems.
- Supported approximately 20 customers, using CMD and built-in tools to troubleshoot issues and explain solutions.

2021–2024 **ISRAELI AIR FORCE — AIRCRAFT TECHNICIAN**

- Performed technical inspections and troubleshooting of aircraft systems in a high-pressure operational environment, following procedures, checklists and schedules.

ADDITIONAL TECHNICAL PROJECT

Windows Server & Active Directory Personal Lab
Configured a Windows Server 2025 domain with DNS and a Windows 11 Hyper-V client; managed OUs, users, groups and GPOs, and troubleshot domain-join and sign-in issues.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, VPC, S3, IAM, EKS, ECR, CloudWatch), Terraform
Containers & CI/CD: Kubernetes, Docker, Jenkins (JCasC, Job DSL), GitHub Actions, Git
Systems & Automation: Linux, Windows Server, Active Directory, GPO, Python, Bash, PowerShell
Networking & Monitoring: TCP/IP, DNS, Load Balancing, SSL/TLS, Prometheus, Grafana
Familiar with: Ansible, Helm, ArgoCD, ELK

EDUCATION

2025–2026 **DevOps Course, TRTech Solutions**

Full Matriculation Certificate, Ironi Makif Alef High School, Beer Sheva
Communication & Cinema (11 study units) | English (5 study units)

LANGUAGES

Hebrew: Native | **English:** Professional working proficiency
